

IAMX

OWN YOUR IDENTITY

Identity & Authentication

The IAMX Identity Terminal delivers the core building blocks for digital public infrastructure (DPI) including identification and authentication, cryptographic signatures, verifiable credentials, data exchange, enabling payments, trusted transactions and publicly recognized decentralized identifiers (DIDs).

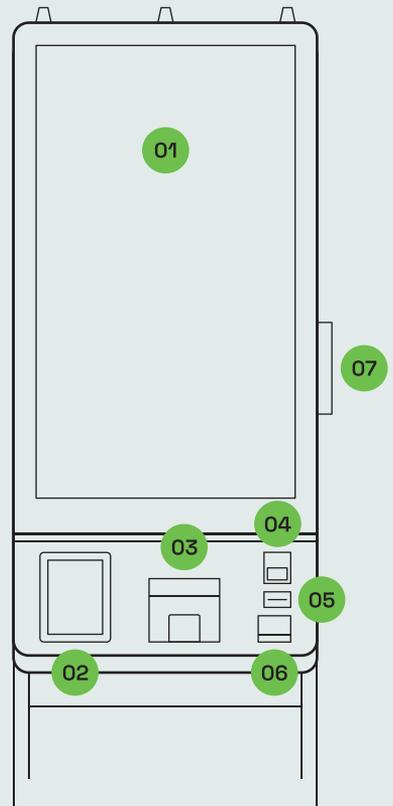

Create a universally accessible foundational ID system

Authenticate ID, passport, drivers license, biometrics on regulatory KYC level

Enable people, businesses, and governments to do trusted transactions

Educate, Entertain, Advertise and enable 1Click-Fulfillment

Terminal

- 01 Display: 65 inch
- 02 Touch Screen
- 03 Scan
- 04 PIN
- 05 Pay
- 06 Print
- 07 Cam

Terminal

IAMX

Construction	Height 296 cm, Weight 242 kg	✓
	Ingress Protection IP53, Display 65 inch 700 knit	✓
	Antimicrobial coating, steel frame, glass	✓
	LAN, WLAN, LTE, Printer, Payment, Payment NFC, Content Management System	✓
	Scanner, Biometric Camera (used for border crossing by states)	✓
	Biometrics: fingerprints flat, fingerprints rolled, face, iris, signature	✓
	ID Documents: 180+ passports, eID	✓
Compliance	FBI fingerprint flat conformity CJIS (IQS) Appendix F	✓
	BSI fingerprint conformity Biometrics for Public Sector Applications	✓
	BSI fingerprint conformity Life detection for each finger	✓
	BSI fingerprint conformity fingerprint segmentation	✓
	BSI Biometrics technology conformity sovereign applications	✓
	BSI conformity for Official Electronic ID Documents, Passports	✓
	Data Protection: Compliance General Data Protection GDPR	✓
	Legal: Legal compliance for sovereign applications	✓
	Security: Liveness-Check, Face Match	✓
	Privacy: Private storage only, customer owned & controlled	✓
	Credentials: portable, interoperable, user-centric, technology neutral	✓
Functions	Technology: did:iamx blockchain-agnostic registered W3C DID-method	✓
	Architecture: Privacy by design, principles of Self-sovereign identity (SSI)	✓
	Enable digital public infrastructure (DPI) inclusive of all population groups	✓
	Create a universally accessible foundational ID system	✓
	Create customer owned digital identity and verifiable credentials	✓
	Authenticate ID, passport, driver's license, biometrics on regulatory KYC level	✓
	Enable people, businesses, and governments to do trusted transactions	✓
	Enable to create officially used digital identity, birth certificates, wills	✓
	Enable cryptographic signatures, payment wallets, data exchange, VISA's	✓
	Enable financial inclusion, payment systems, credit infrastructure	✓
Enable education, learn 2 earn, early childhood development	✓	
Enable gender equality in education, health, and economic growth	✓	
Incentivize individuals for earmarked milestones with end-2-end donation	✓
