OWN YOUR IDENTITY

Authenticated E-Signatures with Docufi3d

Docufi3d is a software solution that revolutionizes the way contracts are signed and secured.

Docufi3d completely replaces traditional handwritten signatures offering a more reliable and secure method of signing documents.

Docufi3d eliminates any doubts regarding the mutual authenticity of the signer's identity based on a reusable regulatory compliant Know Your Customer (KYC) check.

Docufi3d increases the processing time of a signature process by 10x and enables 90 % lower costs compared to handwritten signage process.

Product Features Comparison*
